

Inspiration 2009

DESIGNING ATMOSPHERE IN 60 YEARS FOR EVERY EATING AND DRINKING OCCASION

Welcome to Duni Inspiration 2009. This broad assortment of table-setting concepts is rooted in Duni's 60-year dedication to designing atmosphere, which still today creates the foundation when we produce our premium quality products and design concepts for every eating and drinking occasion.

Duni produced its first disposable wax cup in 1949. Since then our product assortments have expanded and evolved in line with

contemporary trends and customer desires – while remaining rooted in timeless elegance and good taste.

For us it has never simply been a matter of producing premium quality products and design concepts, we seek to enhance atmosphere and make the table the active centrepiece of any eating or drinking occasion.

Our first 60 years have learnt us to act in a responsible way for the future. 70% of our products are being produced of renewal materials such as wood, in well-kept forests in northern Europe. When a tree is harvested in these forests, a new one is replanted in a natural cycle adapted after nature's conditions. We also implement continuous improvements in our factories where water consumption, spill and energy consumption have decreased during the last five years. We permanently evaluate new environmentally friendly materials, and

have introduced new biodegradable products made of starch. For more information on Environmental and Social Responsibility, please visit: www.dunibusiness.com/About-us/Social-Responsibility

Duni is represented on more than 40 markets with 2000 employees – all dedicated to designing atmosphere. We hope this guide will inspire you to do the same for your own customers.

NATURAL WORLD

OLD TRADITIONS

STYLES & TRENDS 2009

Natural World

Embrace the allure of nature: primal, fresh, pure, where every colour and nuance functions in perfect harmony. Nature has always inspired, and never more so than in this environmentally aware era. Powerful and vibrant, the Natural World line invokes the blue of the oceans and rivers and the greens of the forests. Shiny yellows, beige, brown and white further enrich the colour scheme in homage to light, wind, earth and sky. The prints use animals, floral motifs, water flow and geometric patterns.

Luxury meets Minimalism

Luxuriate in the calm grace of clean lines, clear uncluttered space and the soft simplicity of minimalist chic. The old maxim 'less is more' is encapsulated in this simple yet elegant line. It combines the look and feel of organic materials such as wood, stone and natural fibre. The basic colours are black, white and beige. The prints are simple but original with a handmade impression.

Old traditions

Be inspired by echoes of the past: the understated style and the effortless class. Some traditions never go out of vogue, because good taste is eternal. This is a romantic style with a feminine touch. Old Traditions combines vintage charm with a subtle flower theme with fresh pastel colours such as vanilla, beige, grey, lilac, lemon and soft shades of pink and turquoise. The decoration employs refined tone-on-tone prints and floral motifs.

Ethno Chic

Revel in the sights, scents and sounds of the bazaar; a place where people and worlds come together and the exotic never loses its allure. Ethno Chic is an eclectic blend of traditional motifs, art and colour schemes from around the world. The primary colours are mustard, yellow, red, petrol, indigo blue, brown grey and black with dark and light colours blended as accents.

Elegance

DUNILIN®

DUNICEL®

Elegance is the first disposable napkin in the world that is no less superior to a fabric napkin. This is possible because of a patented production process and a basis weight of 130 g/m². Its appealing texture, linen-look embossing and high absorption capacity give guests the impression that they are holding an exclusive fabric in their hands.

DUNILIN® is Duni's unique material with the positive features of a textile napkin added with strong hygienical, environmental and design features. The material itself is based on airlaid tissue in a controlled specialized process. Feel the softness in the material and make use of the superior absorbing effect. **DUNILIN®** napkins are available in 40x40 cm and 32x32 cm, in brilliant uni colors as well as in many seasonal and year-round designs.

DUNICEL® is a unique material based on tissue. Because of the heavy weight of **DUNICEL®** the material is ideal for table covering. **DUNICEL®** comes along as slipcover, table cover, table runner and placemat. Our latest innovation made of **DUNICEL®** is the Tête à Tête. Decorative prints and the heavy weight make them really linen-like.

DUNISILK®+ is a further improvement of our Dunisilk material. The new Dunisilk+ tablecloth are made of a unique base material that is almost twice as thick as the previous material. This allows an even nicer and textile like draping. Dunisilk+ tablecloth have a surface coating so they can be wiped clean. They offer an excellent value for money because they can be used again and again. Dunisilk+ is also an excellent outdoor solution.

Market Research

Duni recently carried out market research, with the aim of learning more about customers' needs. The research revealed significant potential for category growth. We used 200,000 minutes, the equivalent of 139 days, to obtain a comprehensive profile of our mutual customers. Starting today, everything we sell is based on consumer and shopper insights; 1 in 2 consumers leaves the category without making a purchase. So let's create some excitement & inspirational solutions for your our mutual customers.

What the shopper is looking for:

- Inspirations
- Concept solutions
- Innovations to satisfy consumer needs
- Merchandising & In Store come to easy shopping
- Promotional solutions for specific shoppers

The categories seen from the shopper's point of view!

Summer/Outdoor

Seasonal & Events

Everyday

The Formal Quality group is characterized by products for the most formal occasions that look sophisticated and real to both shoppers and their guests. Products should be both functional and decorative for the planned occasion. As most expect these products to be at the higher end of the pricing scale, they are expected to occupy the higher shelves. This is the group where the look is one of the most important aspects, and shoppers are willing to spend more time browsing for the perfect concept.

This group is categorized by type of design as well as the less formal entertaining occasions. In-store solutions that offer ideas of how products can be grouped to create a table setting would be warmly welcomed here, as shoppers that are drawn to these designs are more than likely to try new things. They are looking for easy ways to implement new ideas and want to be shown how to use combinations and concepts of products to create new effects.

Themes are essential for this category of products, and therefore matching products and concepts need to be placed together. Shoppers are willing to spend time looking for the right products for their occasion. Placing kids party products at eye level would aid shoppers in their search. However, since children can also be involved in the decision-making process, it is important that products are not placed too high up where they cannot see them.

As summer (and the ensuing picnics, BBQs and other outdoor events) is an important time for consumers, this section of the category needs to offer a broad range of summer/outdoor season products. Most shoppers look for matching products for the occasion and they say that a category organized in such a way would enable them to engage with the fixture and enjoy the experience of browsing for the right concept.

It's during the festive season shoppers say that they are the busiest, and the majority would welcome a dedicated fixture that enables them to browse a selection of themed products. Shoppers do not want to spend too much time at the fixture and would like to be able to pick up products with the least effort – so products need to be organized by occasion, color and design.

Everyday products are assumed by shoppers to be the lowest-priced disposable tableware products and therefore are expected to occupy the lowest shelves in the category. Although products for everyday use are the least likely to be purchased as a part of a matching set of products, it's still important that products are grouped by color.
